

Webinar Series – Maintaining Aircraft Control by Mindstar Community Aviation

Loss of Control is on the NTSB most wanted list for 2015. Most loss of control accidents occur during the maneuvering phase, and often culminate in an inadvertent stall/spin. Learn the difference between technique and procedure. Review results of NASA spin tests. Discover what is and isn't in your AFM. Rich Stowell has performed more than 33,000 spins and is the 2014 National FAASTeam Rep of the Year.

Directions: To register and for more information, visit www.communityaviation.com/rich-stowell/pare-procedure. After registering, you will receive a confirmation email with instructions for joining the webinar on the GoToTraining platform. Check your email Spam folder just in case. Webinar hosted by Mindstar Community Aviation.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.
